Subject index

A

Additives, dietary free from, in management of allergic disease, 24 (Abst.)
Adenosine monophosphate, cyclic, regulatory effect of, on human B cell activation; activation of human B lymphocytes (Katz, P., and Fauci, A. S.), 334
Adenylate cyclase activity, basal, reduction in, during immunologic release of histamine from guinea pig lung, 19 (Abst.)
Adrenergic responses of asthmatic and normal subjects to submaximal and maximal work levels (Chryssanthopoulos, C., et al.), 17
  responsiveness in normal and asthmatic subjects, comparative effects of ephedrine on (Morris, H. G., et al.), 294
Aerosol beclomethasone and oral prednisone, minimum dose requirements of steroid-dependent asthmatic patients for (Toogood, J. H., et al.), 355
Agammaglobulinemia, sex-linked, vaccine-associated poliomyelitis in child with, 2 (Abst.)
Air-conditioned homes, effects of air cleaners on hay fever symptoms in (Kooistra, J. B., et al.), 315
Airway responses to exercise in mild asthmatics (Schachter, E. N., et al.), 390
    to immunologic and pharmacologic stimuli in rhesus monkeys, qualitative evaluation of (Patterson, R., and Harris, K. E.), 261
Allergen-induced asthma, comparison of protective effect of fenoterol and Schl000 on (Ruffin, R. E., et al.), 42
Allergic alveolitis, extrinsic, antigens implicated in pathogenesis of (Slavin, R.), 223
  bronchopulmonary aspergillosis in infants, 18 (Abst.)
  disease, dietary free from additives in management of, 24 (Abst.)
  drug reactions; in vitro model using mixed function oxidase complex to demonstrate antibodies with specificity for practolol metabolite, 10 (Abst.)
  reaction, generalized, to monocomponent insulin, 22 (Abst.)
  tissue injury, enhanced, in Goodpasture's syndrome by intercurrent bacterial infection, 25 (Abst.)
Allergy(ies), American Academy of, abstracts of papers given at annual meeting, 129
  animal dander, 10 (Abst.)
  house dust, human dander in, 24 (Abst.)
  to insects in Japan; reaginic sensitivity to moth and butterfly in patients with bronchial asthma (Kino, T., and Oshima, S.), 10
  miscellaneous, 3, 9, 14, 21, 24 (Absts.)
  to phenylpropanolamine, 30 (Abst.)
  reaginic, reappraisal of intracutaneous tests in diagnosis of (Reddy, P. M., et al.), 36
Allergy(ies)—Cont'd
  respiratory, sinus disease in children with (Rachelefsky, G. S., et al.), 310
Alum-precipitated and unprecipitated aqueous ragweed pollen extracts in treatment of hay fever, comparisons of (Norman, P. S., and Lichtenstein, L. M.), 384
Alveolitis, extrinsic allergic, antigens implicated in pathogenesis of (Slavin, R.), 223
American Academy of Allergy, abstracts of papers given at annual meeting, 129
Aminophylline and terbutaline, bronchodilator effects of, alone and in combination in asthmatic patients, 29 (Abst.)
Anaphylactic reactions to plasma infusions in patients with hypogammaglobulinemia and anti-IgA antibodies, 31 (Abst.)
  sensitization, homocytotropic antibody formation and (Mattikow, M. S.), 195 (Correspondence)
Anaphylaxis, 5, 12 (Absts.)
  passive peritoneal, in rat, further studies on, 12 (Abst.)
  to protamine sulfate mediated by complement-dependent IgG antibody (Lakin, J. D., et al.), 102
Anesthetics, local, administration of, to patients with history of prior adverse reaction (Incaudo, G., et al.), 339
Angioedema, chronic urticaria and, studies of C1 subcomponents in, 15 (Abst.)
  erythropoietic protcporphyria masquerading as (Weston, W. L.), 408 (Correspondence)
  hereditary, evidence for nonlinkage of genes for HLA and (Jackson, C. E., et al.), 331
Animal dander allergy, 10 (Abst.)
    house dust, and pollen allergens in adult patients, diagnosis of reaginic allergy with, 11 (Abst.)
Announcements, 1, 66, 128, 196, 279, 346; 410 (Allergy Absts.)
Antibody(ies), anti-IgA, anaphylactic reactions to plasma infusions in patients with hypogammaglobulinemia and, 31 (Abst.)
  complement-dependent IgG, anaphylaxis to protamine sulfate mediated by (Lakin, J. D., et al.), 102
  dependent lymphocytotoxicity induced by immunoglobulin G from Hodgkin's disease splenic lymphocytes, 27 (Abst.)
  deposition in pleura; finding in drug-induced lupus (Chandrasekhar, A. J., et al.), 399
  familial human short-term sensitizing (IgG S-TS), 13 (Abst.)
  formation, homocytotropic, and anaphylactic sensitization (Mattikow, M. S.), 195 (Correspondence)
  reactivity in penicillin-sensitive patients determined with different penicillin derivatives, 9 (Abst.)
  response, hapten-specific IgE, suppression of; effects of tolerogenic conjugates in canine model for reaginic hypersensitivity (Tse, K. S., et al.), 303
    IgE, to mite antigen in mouse (Kudo, K., et al.), 1
  secretory IgA, against cow's milk proteins in human milk and their possible effect in mixed feeding, 15 (Abst.)
  timothy-specific IgE, in patients with allergic rhinitis, seasonal studies of; immunoglobulins in nasal secretions with special reference to IgE, 7 (Abst.)

January, pp. 1-66; February, pp. 67-128; March, pp. 129-198; April, pp. 199-280; May, pp. 281-346; June, pp. 347-422.
Abstracts: January, pp. 1-6; February, pp. 7-12; March, pp. 13-16; April, pp. 17-22; May, pp. 23-28; June, pp. 29-32.

Antigen(s) diversity in pigeon breeder's disease (Berrens, L.), 219
and hypersensitivity pneumonitis (Pepys, J.), 201
NIAID Workshop on, 199
implicated in pathogenesis of extrinsic allergic alveolitis (Slavin, R.), 223
isolation and preparation of (Lehrer, S.), 203
in pigeon dropping extracts (Fredricks, W.), 221
polyvalent monomeric and polymeric ragweed, comparison of immune reactivity to (Patterson, R., et al.), 28
recognition; specificity of isolated T lymphocyte population, 26 (Abst.)
standardization of (Baer, H.), 206
variants, culture and, of *Aspergillus* (Bardana, E. J., Jr.), 225
Aqueous ragweed pollen extracts, alum-precipitated and unprecipitated, in treatment of hay fever, comparisons of (Norman, P. S., and Lichtenstein, L. M.), 384
Aspergillosis, allergic bronchopulmonary, in infants, 18 (Abst.)
Aspergillus, culture and antigen variants of (Bardana, E. J., Jr.), 225
Asthma, allergen-induced, comparison of protective effect of fenoterol and Sch1000 on (Ruffin, R. E., et al.), 42
bronchial, circulating hyperreactive lymphocytes in, 17 (Abst.)
double-blind trial of oral carbuterol in, 1 (Abst.)
effects of oral terbutaline in children with (Michaelson, E. D., et al.), 365
reaginic sensitivity to moth and butterfly in patients with; allergy to insects in Japan (Kino, T., and Oshima, S.), 10
subsensitivity of T lymphocytes to sympathomimetic and cholinergic stimulation in (Lang, P., et al.), 248
cat-induced, immunotherapy in (Taylor, W. W., et al.), 283; 409 (Erratum)
and hay fever, 1, 7, 13, 17, 23, 29 (Absts.)
IgE, parasites and, in Tanzanian children, 24 (Abst.)
induced by sulfur dioxide, benzoate and tartrazine contained in orange drinks, 21 (Abst.)
intrinsic and extrinsic, analysis of immunological features of, and clinical response to DSCG, 23 (Abst.)
occupational (Karr, R. M., et al.), 54 (Allergy grand rounds)
Asthmatic(s) children, chronic, receiving therapeutic doses of theophylline, effect of metaproterenol in (Galant, S. P., et al.), 73
mild, airway responses to exercise in (Schachter, E. N., et al.), 390
and normal subjects, adrenergic responses of, to submaximal and maximal work levels (Chryssanthopoulos, C., et al.), 17
patients on alternate-day steroid therapy, monocyte cellular function in (Norris, D. A., et al.), 255
bronchodilator effects of terbutaline and aminophylline alone and in combination in, 29 (Abst.)
steroid-dependent, minimum dose requirements of, for aerosol beclomethasone and oral prednisone (Toogood, J. H., et al.), 355
subjects, normal and, comparative effects of ephedrine on adrenergic responsiveness in (Morris, H. G., et al.), 294
Atopic children, distribution of peripheral blood T and B lymphocyte markers in, and changes during immunotherapy (Neiburger, R. G., et al.), 88
disease, defective monocyte and polymorphonuclear leukocyte chemotaxis in (Furukawa, C. T., and Altman, L. C.), 288
Atopy, complexed IgE in, 15 (Abst.)
4,4′-Azoxybenzenedisulfonamide, positive skin reaction induced by, in relationship to sulfanilamide allergy, 2 (Abst.)

B

Bacterial infection, intercurrent, enhanced allergic tissue injury in Goodpasture's syndrome by, 25 (Abst.)
Bakers, flour allergy in; identification of allergenic fractions in flour and comparison of diagnostic methods, 3 (Abst.)
Basophils and mast cells, failure of putative IgE pentapeptide to compete with IgE for receptors on, 11 (Abst.)
Beclomethasone, aerosol, and oral prednisone, minimum dose requirements of steroid-dependent asthmatic patients for (Toogood, J. H., et al.), 355
Beekeepers and their family members, immunological and biochemical studies in (Yunginger, J. W., et al.), 93
Benzoate, tartrazine and sulfur dioxide contained in orange drinks, asthma induced by, 21 (Abst.)
Biochemical studies, immunlogical and, in beekeepers and their family members (Yunginger, J. W., et al.), 93
Bronchial asthma, circulating hyperreactive lymphocytes in, (Abst.)
double-blind trial of oral carbuterol in, 1 (Abst.)
effects of oral terbutaline in children with (Michaelson, E. D., et al.), 365
reaginic sensitivity to moth and butterfly in patients with; allergy to insects in Japan (Kino, T., and Oshima, S.), 10
subsensitivity of T lymphcytes to sympathomimetic and cholinergic stimulation in (Lang, P., et al.), 248
reactivity and immunotherapy (Norman, P. S.), 281 (Editorial)
Bronchodilator effects of terbutaline and aminophylline alone and in combination in asthmatic patients, 29 (Abst.)
Bronchopulmonary aspergillosis, allergic, in infants, 18 (Abst.)
Bronchospasm, exercise-induced, acute and chronic theophylline therapy in, 18 (Abst.)
Butterfly, moth and, reaginic sensitivity to, in patients with bronchial asthama; allergy to insects in Japan (Kino, T., and Oshima, S.), 10

C

Canine model for reaginic hypersensitivity; suppression of hapten-specific IgE antibody response (Tse, K. S., et al.), 303
Carbuterol, oral, double-blind trial of, in bronchial asthma, 1 (Abst.)
Cat-induced asthma, immunotherapy in (Taylor, W. W., et al.), 283; 409 (Erratum)
Cell activation, human B, regulatory effect of cyclic adenosine monophosphate on; activation of human B lymphocytes (Katz, P., and Fauci, A. S.), 334
-bound IGE in human mast cells and basophilic granulocytes in atopic and nonatopic subjects, 9 (Abst.)
populations, T and B, in peripheral blood of rhesus monkeys, 4 (Abst.)
Cellular function, monocyte, in asthmatic patients on alternate-day steroid therapy (Norris, D. A., et al.), 255
Cervico-vaginal secretions, human, immunoglobulins in, 4 (Abst.)
Chemotaxis, defective monocyte and polymorphonuclear leukocyte, in atopic disease (Furukawa, C. T., and Altman, L. C.), 288
eosinophil, to ECF-A tetrapeptide and histamine; response in various disease states, 3 (Abst.)
Child with status asthmaticus, value of pulsus paradoxus in assessing, 30 (Abst.)
Children with bronchial asthma, effects of oral terbutaline in (Michaelson, E. D., et al.), 365
with respiratory allergy, sinus disease in (Rachelefsky, G. S., et al.), 310
Cholinergic stimulation, sympathomimetic and, subsensitivity of T lymphocytes to, in bronchial asthma (Lang, P., et al.), 248
Clinical and immunologic specificity of immunotherapy (Norman, P. S., and Lichtenstein, L. M.), 370
Clubbing, digital, recurrent pulmonary infiltrates, and failure to thrive in 4-year-old boy (Krantman, H. J., et al.), 403 (Allergy rounds)
Complement-dependent IgG antibody, anaphylaxis to protamine sulfate mediated by (Lakin, J. D., et al.), 102
Complement system, involvement of, in hypersensitivity pneumonitis (Marx, J.), 208

Concanavalin A, histamine hypersensitivity in mice induced by (Doyle, R. J., et al.), 108
Contraceptives, oral, erythema nodosum associated with pregnancy and, 27 (Abst.)
Cryoglobulinaemia in Henoch-Schönlein purpura, 21 (Abst.)
Culture and antigen variants of *Aspergillus* (Bardana, E. J., Jr.), 225
Cyclic adenosine monophosphate, regulatory effect of, on human B cell activation (Katz, P., and Fauci, A. S.), 334

D

Dander, human, in house dust allergy, 24 (Abst.)
Dermatology, 2 (Absts.)
Dietary free from additives in management of allergic disease, 24 (Abst.)
Digital clubbing, recurrent pulmonary infiltrates, and failure to thrive in 4-year-old boy (Krantman, H. J., et al.), 403 (Allergy rounds)
Disease, allergic, dietary free from additives in, 24 (Abst.)
  atopic, defective monocyte and polymorphonuclear leukocyte chemotaxis in (Furukawa, C. T., and Altman, L. C.), 288
  sinus, in children with respiratory allergy (Rachelefsky, G. S., et al.), 310
Disodium cromoglycate, intransasally administered, treatment of ragweed hay fever with, 17 (Abst.)
Donor, unrelated, reconstitution in severe combined immunodeficiency by transplantation of marrow from, 25 (Abst.)
Dose requirements, minimum, of steroid-dependent asthmatic patients for aerosol beclomethasone and oral prednisone (Toogood, J. H., et al.), 355
Drug-induced lupus, antibody deposition in pleura a finding in (Chandrasekhar, A. J., et al.), 399
DSCG, analysis of immunological features of intrinsic and extrinsic asthma and clinical response to, 23 (Abst.)

E

Eczema, rickets, and food allergy (Bierman, C. W., et al.), 119 (Allergy grand rounds)
Enzyme immunoassay, magnetic, for measuring human IgE (Guesdon, J.-L., et al.), 23
Eosinophil accumulation, cutaneous, in atopic and non-atopic individuals; effect of ECF-A tetrapeptide and histamine, 8 (Abst.)
  chemotaxis to an ECF-A tetrapeptide and histamine; response in various disease states, 3 (Abst.)
  migration, histamine modulation of, 14 (Abst.)
Ephedrine, comparative effects of, on adrenergic responsiveness in normal and asthmatic subjects (Morris, H. G., et al.), 294
Erythema nodosum associated with pregnancy and oral contraceptives, 27 (Abst.)
Erythropoietic protoporphyria masquerading as angioedema (Weston, W. L.), 408 (Correspondence)
Exercise, airway responses to, in mild asthmatics (Schachter, E. N., et al.), 390

F

Fenoterol and Sch1000, comparison of protective effect of, on allergen-induced asthma (Ruffin, R. E., et al.), 42
Flour allergy in bakers; identification of allergenic fractions in flour and comparison of diagnostic methods, 3 (Abst.)
Food allergy, eczema, rickets, and (Bierman, C. W., et al.), 119 (Allergy grand rounds)

G

Gamma globulin, intravenous, in management of patients with hypogammaglobulinemia (Magilavy, D. B., et al.), 378
Genes, evidence for nonlinkage of, for HLA and hereditary angioedema (Jackson, C. E., et al.), 331
Globulin, intravenous gamma, in management of patients with hypogammaglobulinemia (Magilavy, D. B., et al.), 378
Goodpasture's syndrome, enhanced allergic tissue injury in, by intercurrent bacterial infection, 25 (Abst.)
Granulocytes, basophilic, cell-bound IgE in human mast cells and, in atopic and nonatopic subjects, 9 (Abst.)
Guinea pig lung, reduction in basal adenylate cyclase activity during immunologic release of histamine from, 19 (Abst.)
  T lymphocyte surface component cross-reactive with immunoglobulin, visualization of, 32 (Abst.)

H

Hapten-specific IgE antibody response, suppression of; effects of tolerogenic conjugates in canine model for reaginic hypersensitivity (Tse, K. S., et al.), 303
Hay fever, asthma and, 1, 7, 13, 17, 23, 29 (Absts.)
  comparisons of alum-precipitated and unprecipitated aqueous ragweed pollen extracts in treatment of (Norman, P. S., and Lichtenstein, L. M.), 384
  ragweed, treatment of, with intranasally administered disodium cromoglycate, 17 (Abst.)
  symptoms, effects of air cleaners on, in air-conditioned homes (Kooistra, J. B., et al.), 315
Heat urticaria, localized (Daman, L., et al.), 273
Henoch-Schönlein purpura, cryoglobulinaemia in, 21 (Abst.)
Hereditary angioedema, HLA and, evidence for nonlinkage of genes for (Jackson, C. E., et al.), 331
Herpes simplex virus–induced lymphocyte blastogenesis, depressed, in individuals with severe recurrent herpes infections, 20 (Abst.)
Histamine, ECF-A tetrapeptide and, eosinophil chemotaxis to; response in various disease states, 3 (Abst.)
  effect of ECF-A tetrapeptide and; cutaneous eosinophil accumulation in atopic and non-atopic individuals, 8 (Abst.)
  hypersensitivity in mice induced by concanavalin A (Doyle, R. J., et al.), 108
  immunologic release of, from guinea pig lung, reduction in basal adenylate cyclase activity during, 19 (Abst.)
  levels, tissue fluid, assessment of, in patients with urticaria (Kaplan, A. P., et al.), 360
  modulation of eosinophil migration, 14 (Abst.)
  release of, and formation of prostaglandins in human lung tissue and rat mast cells, 8 (Abst.)
    from human leukocytes by human IgG_4 subclass, inhibition of reagin-mediated PCA reactions in monkeys and, 27 (Abst.)
    IgE-mediated, new concept of triggering mechanisms of (Ishizaka, T., et al.), 320
    measurement of stomach acidity as test for, in cold urticaria (Lass, N.), 195 (Correspondence)
Histocompatibility complex, major, suppressor T cell product, which depresses passive transfer of contact sensitivity, shares epitope(s) with, 32 (Abst.)
HLA and hereditary angioedema, evidence for nonlinkage of genes for (Jackson, C. E., at al.), 331
Hodgkin's disease splenic lymphocytes, antibody-dependent lymphocytotoxicity induced by immunoglobulin G from, 27 (Abst.)
Homes, air-conditioned, effects of air cleaners on hay fever symptoms in (Kooistra, J. B., et al.), 315
Homocytotropic antibody formation and anaphylactic sensitization (Mattikow, M. S.), 195 (Correspondence)
Horse allergens, hypersensitivity to, RAST in diagnosis of; comparison with clinical history and in vivo tests, 19 (Abst.)
House dust allergy, human dander in, 24 (Abst.)
  animal dander and pollen allergens, diagnosis of reaginic allergy with, in adult patients, 11 (Abst.)

Human B cell activation, regulatory effect of cyclic adenosine monophosphate on; activation of human B lymphocytes (Katz, P., and Fauci, A. S.), 334
dander in house dust allergy, 24 (Abst.)
Hymenoptera whole body extract therapy, sensitization following (Hunt, K. J., et al.), 48
Hyperreactive lymphocytes, circulating, in bronchial asthma, 17 (Abst.)
Hypersensitivity, histamine, in mice induced by concanavalin A (Doyle, R. J., et al.), 108
to horse allergens, RAST in diagnosis of; comparison with clinical history and in vivo tests, 19 (Abst.)
lung disease; early diagnosis (Metzger, W. J., et al.), 67
studies of, with emphasis on solid-phase radioimmunoassay as potential diagnostic aid (Patterson, R.), 216
pneumonitis, antigens and (Pepys, J.), 201
experimental; reduced severity of clinical response following repeated injections of *Micropolyspora faeni* antigen, 4 (Abst.)
humoral and cellular immunologic aspects of (Moore, V.), 210
involvement of complement system in (Marx, J.), 208
NIAID Workshop on, 199
reaction, reagin-mediated, in rat hindpaw and its inhibition by antianaphylactic drugs, 5 (Abst.)
reaginic, effects of tolerogenic conjugates in canine model for; suppression of hapten-specific IgE antibody response (Tse, K. S., et al.), 303
Hypogammaglobulinemia and anti-IgA antibodies, anaphylactic reactions to plasma infusions in patients with, 31 (Abst.)
intravenous gamma globulin in management of patients with (Magilavy, D. B., et al.), 378

I

IgA antibodies, secretory, against cow's milk proteins in human milk and their possible effect in mixed feeding, 15 (Abst.)
IgE antibody response, hapten-specific, suppression of; effects of tolerogenic conjugates in canine model for reaginic hypersensitivity (Tse, K. S., et al.), 303
to mite antigen in mouse (Kudo, K., et al.), 1
cell-bound, in human mast cells and basophilic granulocytes in atopic and nonatopic subjects, 9 (Abst.)
complexed, in atopy, 15 (Abst.)
human, magnetic enzyme immunoassay for measuring (Guesdon, J.-L., et al.), 23
-mediated histamine release, new concept of triggering mechanisms of (Ishizaka, T., et al.), 320
parasites and asthma in Tanzanian children, 24 (Abst.)
pentapeptide, putative, failure of, to compete with IgE for receptors on basophils and mast cells, 11 (Abst.)
IgG antibody, complement-dependent, anaphylaxis to protamine sulfate mediated by (Lakin, J. D., et al.), 102
Immune reactivity, comparison of, to polyvalent monomeric and polymeric ragweed antigens (Patterson, R., et al.), 28
response of old people, influence of levamisole on, 15 (Abst.)
Immunoassay, magnetic enzyme, for measuring human IgE (Guesdon, J.-L, et al.), 23
Immunodeficiency, severe combined, reconstitution in, by transplantation of marrow from unrelated donor, 25 (Abst.)
Immunoglobulin(s) G from Hodgkin's disease splenic lymphocytes, antibody-dependent lymphocytotoxicity induced by, 27 (Abst.)
in human cervico-vaginal secretions, 4 (Abst.)
in nasal secretions with special reference to IgE; seasonal studies of timothy-specific IgE antibody in patients with allergic rhinitis, 7 (Abst.)
visualization of guinea pig T lymphocyte surface component cross-reactive with, 32 (Abst.)
Immunologic(al) and biochemical studies in beekeepers and their family members (Yunginger, J. W., et al.), 93
features of intrinsic and extrinsic asthma and clinical response to DSCG, analysis of, 23 (Abst.)
and pharmacologic stimuli in rhesus monkeys, qualitative evaluation of airway responses to (Patterson, R., and Harris, K. E.), 261
release of histamine from guinea pig lung, reduction in basal adenylate cyclase activity during, 19 (Abst.)
specificity, clinical and, of immunotherapy (Norman, P. S., and Lichtenstein, L. M.), 370
Immunology, 4, 11, 15, 19, 25, 31 (Absts.)
Immunotherapy, bronchial reactivity and (Norman, P. S.), 281 (Editorial)
in cat-induced asthma (Taylor W. W., et al.), 283; 409 (Erratum)
clinical and immunologic specificity of (Norman, P. S., and Lichtenstein, L. M.), 370
distribution of peripheral blood T and B lymphocyte markers in atopic children and changes during (Neiburger, R. G., et al.), 88
safety of, during pregnancy (Metzger, W. J., et al.), 268
Infants, allergic bronchopulmonary aspergillosis in, 18 (Abst.)
newborn, cellular and humoral factors involvement in enhanced NBT reduction by neutrophil leucocytes of, 13 (Abst.)
Infection, experimental rhinovirus 16, effects of, on airways and leukocyte function in normal subjects (Bush, R. K., et al.), 80
intercurrent bacterial, enhanced allergic tissue injury in Goodpasture's syndrome by, 25 (Abst.)
Infectious lymphocytosis, acute, as T-cell lymphoproliferative syndrome, 31 (Abst.)
Influenza vaccines, bivalent and monovalent, intradermal administration of, 5 (Abst.)
Injury, enhanced allergic tissue, in Goodpasture's syndrome by intercurrent bacterial infection, 25 (Abst.)
Insects in Japan, allergy to; reaginic sensitivity to moth and butterfly in patients with bronchial asthma (Kino, T., and Oshima, S.), 10
Insulin, monocomponent, generalized allergic reaction to, 22 (Abst.)
Isolation and preparation of antigens (Lehrer, S.), 203

J

Japan, allergy to insects in; reaginic sensitivity to moth and butterfly in patients with bronchial asthma (Kino, T., and Oshima, S.), 10

L

Leukocyte(s) chemotaxis, defective monocyte and polymorphonuclear, in atopic disease (Furukawa, C. T., and Altman, L. C.), 288
function, airways and, in normal subjects, effects of experimental rhinovirus 16 infection on (Bush, R. K., et al.), 80
human, inhibition of reagin-mediated PCA reactions in monkeys and histamine release from, by human IgG_4 subclass, 27 (Abst.)
of newborn infants, cellular and humoral factors involvement in enhanced NBT reduction by, 13 (Abst.)
Levamisole, influence of, on immune response of old people, 15 (Abst.)
treatment, Sjögren's syndrome contraindication to? 30 (Abst.)
Lung disease, hypersensitivity; early diagnosis (Metzger, W. J., et al.), 67
studies of, with emphasis on solid-phase radioimmunoassay as potential diagnostic aid (Patterson, R.), 216
tissue, human, and rat mast cells, release of histamine and formation of prostaglandins in, 8 (Abst.)
Lupus, drug-induced, antibody deposition in pleura a finding in (Chandrasekhar, A. J., et al.), 399

Lymphocyte(s) blastogenesis, depressed herpes simplex virus–induced, in individuals with severe recurrent herpes infections, 20 (Abst.)
circulating hyperreactive, in bronchial asthma, 17 (Abst.)
Hodgkin's disease splenic, antibody-dependent lymphocytotoxicity induced by immunoglobulin G from, 27 (Abst.)
human B, activation of; regulatory effect of cyclic adenosine monophosphate on human B cell activation (Katz, P., and Fauci, A. S.), 334
markers, peripheral blood T and B, distribution of, in atopic children and changes during immunotherapy (Neiburger, R. G., et al.), 88
population, isolated T, specificity of; antigen recognition, 26 (Abst.)
response, in vitro, persistence of, to tuberculin in skin test negative children immunized with BCG in infancy, 7 (Abst.)
T, subsensitivity of, to sympathomimetic and cholinergic stimulation in bronchial asthma (Lang, P., et al.), 248
Lymphocytosis, acute infectious, as T-cell lymphoproliferative syndrome, 31 (Abst.)
Lymphocytotoxicity, antibody-dependent, induced by immunoglobulin G from Hodgkin's disease splenic lymphocytes, 27 (Abst.)
Lymphoproliferative syndrome, T-cell, acute infectious lymphocytosis as, 31 (Abst.)

M

Magnetic enzyme immunoassay for measuring human IgE (Guesdon, J.-L., et al.), 23
Marrow from unrelated donor, transplantation of, reconstitution in severe combined immunodeficiency by, 25 (Abst.)
Mast cells, basophils and, failure of putative IgE pentapeptide to compete with IgE for receptors on, 11 (Abst.)
Metaproterenol, effect of, in chronic asthmatic children receiving therapeutic doses of theophylline (Galant, S. P., et al.), 73
Mice, histamine hypersensitivity in, induced by concanavalin A (Doyle, R. J., et al.), 108
Micropolyspora faeni antigen, reduced severity of clinical response following repeated injections of; experimental hypersensitivity pneumonitis, 4 (Abst.)
Milk proteins, cow's, secretory IgA antibodies against, in human milk and their possible effect in mixed feeding, 15 (Abst.)
Mite antigen in mouse, IgE antibody response to (Kudo, K., et al.), 1
Monkey(s), inhibition of reagin-mediated PCA reactions in, and histamine release from human leukocytes by human IgG_4 subclass, 27 (Abst.)
rhesus, T and B cell populations in peripheral blood of, 4 (Abst.)
Monocyte cellular function in asthmatic patients on alternate-day steroid therapy (Norris, D. A., et al.), 255
macrophage function in newborn, 26 (Abst.)
and polymorphonuclear leukocyte chemotaxis, defective, in atopic disease (Furukawa, C. T., and Altman, L. C.), 288
Moth and butterfly, reaginic sensitivity to, in patients with bronchial asthma; allergy to insects in Japan (Kino, T., and Oshima, S.), 10
Mouse, mite antigen in, IgE antibody response to (Kudo, K., et al.), 1

N

Nasal secretions, immunoglobulins in, with special reference to IgE; seasonal studies of timothy-specific IgE antibody in patients with allergic rhinitis, 7 (Abst.)
Newborn, monocyte-macrophage function in, 26 (Abst.)
NIAID Workshop on antigens in hypersensitivity pneumonitis, 199
Nitroblue tetrazolium (NBT) reduction, enhanced, by neutrophil leucocytes of newborn infants, cellular and humoral factors involvement in, 13 (Abst.)

O

Occupational asthma (Karr, R. M., et al.), 54 (Allergy grand rounds)

P

Parasites, IgE, and asthma in Tanzanian children, 24 (Abst.)
Pathology, pharmacology, physiology, and 3, 8, 14, 18, 30 (Absts.)
PCA reactions, reagin-mediated, in monkeys, inhibition of, and histamine release from human leukocytes by human IgG_4 subclass, 27 (Abst.)
Pediatrics, 2, 7, 13, 18, 31 (Absts.)
Penicillin-sensitive patients, antibody reactivity in, determined with different penicillin derivatives, 9 (Abst.)
Pentapeptide, putative IgE, failure of, to compete with IgE for receptors on basophils and mast cells, 11 (Abst.)
Peritoneal anaphylaxis, passive, in rat, further studies on, 12 (Abst.)
Pharmacologic stimuli, immunologic and, in rhesus monkeys, qualitative evaluation of airway responses to (Patterson, R., and Harris, K. E.), 261
Pharmacology, physiology, and pathology, 3, 8, 14, 18, 30 (Absts.)
Phenylpropanolamine, allergy to, 30 (Abst.)
Physiology, pharmacology, and pathology, 3, 8, 14, 18, 30 (Absts.)
Pigeon breeder's disease, antigen diversity in (Berrens, L.), 219
dropping extracts, antigens in (Fredricks, W.), 221
Plasma infusions, anaphylactic reactions to, in patients with hypogammaglobulinemia and anti-IgA antibodies, 31 (Abst.)
Pleura, antibody deposition in; finding in drug-induced lupus (Chandrasekhar, A. J., et al.), 399
Pneumonitis, experimental hypersensitivity; reduced severity of clinical response following repeated injections of *Micropolyspora faeni* antigen, 4 (Abst.)
hypersensitivity, antigens and (Pepys, J.), 201
humoral and cellular immunologic aspects of (Moore, V.), 210
involvement of complement system in (Marx, J.), 208
NIAID Workshop on antigens in, 199
Poliomyelitis, vaccine-associated, in child with sex-linked agammaglobulinemia, 2 (Abst.)
Pollen allergens, diagnosis of reaginic allergy with house dust, animal dander, and, in adult patients, 11 (Abst.)
extracts, alum-precipitated and unprecipitated aqueous ragweed, in treatment of hay fever, comparisons of (Norman, P. S., and Lichtenstein, L. M.), 384
Polymorphonuclear leukocyte chemotaxis, defective monocyte and, in atopic disease (Furukawa, C. T., and Altman, L. C.), 288
Practolol metabolite, in vitro model using mixed function oxidase complex to demonstrate antibodies with specificity for; allergic drug reactions, 10 (Abst.)
Prednisone, oral, minimum dose requirements of steroid-dependent asthmatic patients for aerosol beclomethasone and (Toogood, J. H., et al.), 355
Pregnancy and oral contraceptives, erythema nodosum associated with, 27 (Abst.)
safety of immunotherapy during (Metzger, W. J., et al.), 268
Prostaglandins, release of histamine and formation of, in human lung tissue and rat mast cells, 8 (Abst.)

Protamine sulfate, anaphylaxis to, mediated by complement-dependent IgG antibody (Lakin, J. D., et al.), 102
Proteins, urine, of rats and mice, respiratory allergy to, 14 (Abst.)
Pulmonary infiltrates, recurrent, digital clubbing, and failure to thrive in 4-year-old boy (Krantman, H. J., et al.), 403 (Allergy rounds)
Pulsus paradoxus, value of, in assessing child with status asthmaticus, 30 (Abst.)
Purpura, Henoch-Schönlein, cryoglobulinaemia in, 21 (Abst.)

R

Radioimmunoassay as potential diagnostic aid, solid-phase, studies of hypersensitivity lung disease with emphasis on (Patterson, R.), 216
Ragweed antigens, polyvalent monomeric and polymeric, comparison of immune reactivity to (Patterson, R., et al.), 28
hay fever, treatment of, with intranasally administered disodium cromoglycate, 17 (Abst.)
pollen extracts, alum-precipitated and unprecipitated aqueous, in treatment of hay fever, comparisons of (Norman, P. S., and Lichtenstein, L. M.), 384
RAST in diagnosis of hypersensitivity to horse allergens; comparison with clinical history and in vivo tests, 19 (Abst.)
test, use of (Yunginger, J.), 213
Rat hindpaw, reagin-mediated hypersensitivity reaction in, and its inhibition by antianaphylactic drugs, 5 (Abst.)
Reaction(s), anaphylactic, to plasma infusions in patients with hypogammaglobulinemia and anti-IgA antibodies, 31 (Abst.)
prior adverse, administration of local anesthetics to patients with history of (Incaudo, G., et al.), 339
Reagin-mediated hypersensitivity reaction in rat hindpaw and its inhibition by antianaphylactic drugs, 5 (Abst.)
Reaginic allergy, reappraisal of intracutaneous tests in diagnosis of (Reddy, P. M., et al.), 36
Respiratory allergy, sinus disease in children with (Rachelefsky, G. S., et al.), 310
to urine proteins of rats and mice, 14 (Abst.)
Rhesus monkeys, qualitative evaluation of airway responses to immunologic and pharmacologic stimuli in (Patterson, R., and Harris, K. E.), 261
T and B cell populations in peripheral blood of, 4 (Abst.)
Rhinovirus 16 infection, experimental, effects of, on airways and leukocyte function in normal subjects (Bush, R. K., et al.), 80
Rickets, eczema, and food allergy (Bierman, C. W., et al.), 119 (Allergy grand rounds)

S

Sch1000, fenoterol and, comparison of protective effect of, on allergen-induced asthma (Ruffin, R. E., et al.), 42
Sensitization following Hymenoptera whole body extract therapy (Hunt, K. J., et al.), 48
Sinus disease in children with respiratory allergy (Rachelefsky, G. S., et al.), 310
Sjögren's syndrome; contraindication to levamisole treatment? 30 (Abst.)
Skin reaction, positive, induced by 4,4′-azoxybenzenedisulfonamide in relationship to sulfanilamide allergy, 2 (Abst.)
test conversion following transfer factor (Neidhart, J. A., et al.), 115
negative children immunized with BCG in infancy, persistence of in vitro lymphocyte response to tuberculin in, 7 (Abst.)
Status asthmaticus, value of pulsus paradoxus in assessing child with, 30 (Abst.)
Steroid-dependent asthmatic patients, minimum dose requirements of, for aerosol beclomethasone and oral prednisone (Toogood, J. H., et al.), 355
Steroid therapy, alternate-day, monocyte cellular function in asthmatic patients on (Norris, D. A., et al.), 255
Stomach acidity, measurement of, as test for histamine release in cold urticaria (Lass, N.), 195 (Correspondence)
Sulfanilamide allergy, positive skin reaction induced by 4,4′-azoxybenzenedisulfonamide in relationship to, 2 (Abst.)
Sulfur dioxide, benzoate and tartrazine contained in orange drinks, asthma induced by, 21 (Abst.)
Sympathomimetic and cholinergic stimulation in bronchial asthma, subsensitivity of T lymphocytes to (Lang, P., et al.), 248

T

Tanzanian children, IgE, parasites and asthma in, 24 (Abst.)
Tartrazine, benzoate and sulfur dioxide contained in orange drinks, asthma induced by, 21 (Abst.)
T-cell lymphoproliferative syndrome, acute infectious lymphocytosis as, 31 (Abst.)
product, suppressor, which depresses passive transfer of contact sensitivity, shares epitope(s) with major histocompatibility complex, 32 (Abst.)
Terbutaline and aminophylline, bronchodilator effects of, alone and in combination in asthmatic patients, 29 (Abst.)
oral, effects of, in children with bronchial asthma (Michaelson, E. D., et al.), 365
Tests, intracutaneous, reappraisal of, in diagnosis of reaginic allergy (Reddy, P. M., et al.), 36
Tetrapeptide, ECF-A, and histamine, effect of; cutaneous eosinophil accumulation in atopic and non-atopic individuals, 8 (Abst.)
and histamine, ECF-A, eosinophil chemotaxis to; response in various disease states, 3 (Abst.)
Theophylline, effect of metaproterenol in chronic asthmatic children receiving therapeutic doses of (Galant, S. P., et al.), 73
therapy, acute and chronic, in exercise-induced bronchospasm, 18 (Abst.)
Therapy, Hymenoptera whole body extract, sensitization following (Hunt, K. J., et al.), 48
Timothy-specific IgE antibody in patients with allergic rhinitis, seasonal studies of; immunoglobulins in nasal secretions with special reference to IgE, 7 (Abst.)
Tissue fluid histamine levels, assessment of, in patients with urticaria (Kaplan, A. P., et al.), 360
T lymphocyte(s) population, isolated, specificity of; antigen recognition, 26 (Abst.)
subsensitivity of, to sympathomimetic and cholinergic stimulation in bronchial asthma (Lang, P., et al.), 248
surface component, guinea pig, cross-reactive with immunoglobulin, visualization of, 32 (Abst.)
Tolerogenic conjugates, effects of, in canine model for reaginic hypersensitivity; suppression of hapten-specific IgE antibody response (Tse, K. S., et al.), 303
Transfer factor, skin test conversion following (Neidhart, J. A., et al.), 115
Transplantation of marrow from unrelated donor, reconstitution in severe combined immunodeficiency by, 25 (Abst.)
Tuberculin, persistence of in vitro lymphocyte response to, in skin test negative children immunized with BCG in infancy, 7 (Abst.)

U

Urine proteins of rats and mice, respiratory allergy to, 14 (Abst.)
Urticaria, assessment of tissue fluid histamine levels in patients with (Kaplan, A. P., et al.), 360

Urticaria—Cont'd
chronic, and angioedema, studies of C1 subcomponents in, 15 (Abst.)
revisited (Mathews, K. P.), 347 (Editorial)
cold, measurement of stomach acidity as test for histamine release in (Lass, N.), 195 (Correspondence)
localized heat (Daman, L., et al.), 273

V

Vaccine(s)-associated poliomyelitis in child with sex-linked agammaglobulinemia, 2 (Abst.)
Vaccine(s)—Cont'd
bivalent and monovalent influenza, intradermal administration of, 5 (Abst.)
Virus–induced lymphocyte blastogenesis, depressed herpes simplex, in individuals with severe recurrent herpes infections, 20 (Abst.)

W

Work levels, submaximal and maximal, adrenergic responses of asthmatic and normal subjects to (Chryssanthopoulos, C., et al.), 17

Subject index

A

Acknowledgment to reviewers, 321
Actin, effect of, on cell migration, 13 (Abst.)
Actinomycetes, thermophilic, farmer's lung disease among farmers with precipitating antibodies to; clinical and immunologic study (Marx, J. J., Jr., et al.), 185
Aerosol steroid, beclomethasone dipropionate, three- to five-year follow-up of use of, in childhood asthma (Godfrey, S., et al.), 335
  triamcinolone acetonide, treatment of asthma in children with (Sly, R. M., et al.), 76
Age, circulating suppressor cells in man as function of, 8 (Abst.)
Air conditioning, central, and meteorologic factors, effect of, on indoor spore counts (Hirsch, D. J., et al.), 22
Airborne *Aspergillus fumigatus* levels outside and within large clinical center (Solomon, W. R., et al.), 56
Albumin, human serum, and Tween 80 as stabilizers of allergen solutions (Norman, P. S., et al.), 314
Allergen-induced depression of neutrophil chemotaxis in allergic individuals (Rubin, J. L., et al.), 301
Allergen(s), modified, suppression of reaginic antibodies with; abrogation of reaginic antibodies with allergens conjugated to polyethylene glycol, 9 (Abst.)
  reduction in allergenicity of protein allergens by conjugation to polyethylene glycol, 8 (Abst.)
  ragweed and grass, quantitation of IgE antibody specific for; binding of radiolabeled allergens by solid-phase bound IgE (Zeiss, C. R., et al.), 83
  reactivity of, with IgE antibodies (Adolphson, C., et al.), 197
  solutions, human serum albumin and Tween 80 as stabilizers of (Norman, P. S., et al.), 314
  two major timothy pollen, immunological partial identity and in vitro inhibitory effect of, to whole pollen extract of four grasses, 23 (Abst.)
Allergic bronchopulmonary aspergillosis (Imbeau, S. A., et al.), 243 (Allergy grand rounds)
  relationships between prednisone therapy, disease activity, and total serum IgE level in (Imbeau, S. A., et al.), 91
  reactions in skin using skin chamber technique, direct demonstration of histamine release in (Dunsky, E. H., and Zweiman, B.), 127 (Brief communication)
  response to metals following intratracheal instillation, delay in development of, 21 (Abst.)
Allergy (ies), IgE-mediated, cyclic platelet dysfunction in (Gallagher, J. S., et al.), 229
  and immunology, physician manpower in, 61 (Report)
  in United States of America in 1978, status of education in (Frick, O. L.), 1 (Presidential address)
  miscellaneous, 3, 14, 21, 26, (Absts.)
  to product(s) of ethylene oxide gas (Dolovich, J., and Bell, B.), 30
  skin test, terbutaline's effects on (Imbeau, S. A., et al.), 193
  societies, listing of presidents of state, regional, and local, as of February, 1978, 67
American Academy of Allergy, statement by Executive Committee, 71
Ampicillin, benzylpenicillin, and carbenicillin preparations examined with reagin-mediated passive cutaneous anaphylaxis system, eliciting antigenicities of, 26 (Abst.)
Anaphylactic reaction, systemic, in guinea pigs, benzylpenicillin preparation can evoke (Muranaka, M., et al.), 276
Anaphylactoid reactions to iodinated contrast material (Lieberman, P., et al.), 174
Anaphylaxis, 4 (Absts.)
  and pollinosis, disodium cromoglycate in, 4 (Abst.)
  slow-reacting substances of, study of effect of, on rhesus monkey airway (Patterson, R., et al.), 371
Angioedema, acquired, associated with rectal carcinoma and its response to danazol therapy (Cohen, S. H., et al.), 217
Announcements, 70, 130, 191, 256, 320, 381
Antibody(ies) activity in sera of patients with humidifier disease (Patterson, R., et al.), 103
  anti-idiotypic, suppression of reaginic antibody formation in guinea pigs by (Geczy, A. F., et al.), 261
  demonstration of, to chlorphenothiazine derivatives, 22 (Abst.)
  -dependent cellular cytotoxicity of mononuclear cells from asthmatics tested in three in vitro assays (Flaherty, D. K., et al.), 156
  formation, reaginic, in guinea pigs, suppression of, by anti-idiotypic antibodies (Geczy, A. F., et al.), 261
  IgE, reactivity of ragweed allergens with (Adolphson, C., et al.), 197
    specific for ragweed and grass allergens, quantitation of; binding of radiolabeled allergens by solid-phase bound IgE (Zeiss, C. R., et al.), 83
    suppression of, 257 (Editorial)
  precipitating, to thermophilic actinomycetes; farmer's lung disease among farmers with; clinical and immunologic study (Marx, J. J., Jr., et al.), 185
  production, IgE, control of, by suppressor substances (Katz, D. H.), 44
    and other immune responses, relationships between; effect of thymectomy at various times after birth, 25 (Abst.)
  to tetanus toxoid by continuous human lymphoblastoid cell lines, 2 (Abst.)
  reaginic, suppression of, with modified allergens; abrogation of reaginic antibodies with allergens conjugated to polyethylene glycol, 9 (Abst.)
    reduction in allergenicity of protein allergens by conjugation to polyethylene glycol, 8 (Abst.)
  specific, in infants with gastrointestinal intolerance to cow's milk protein, 11 (Abst.)
Antigen(s), *Aspergillus*, among asthmatics in Cleveland and London, comparison of prevalence of sensitization to (Schwartz, H. J., et al.), 9
  fungal, as source of sensitization and respiratory disease in Scottish malt workers, 14 (Abst.)
  -induced leukocyte histamine release, enhancement of, by mononuclear cell–derived factor (Bamzai, A. K., and Kretschmer, R. R.), 137
  -induced neutrophil chemotactic activity in man (Atkins, P. C., et al.), 149
  serum, carcinoembryonic, and alpha-fetoprotein levels in children with solid tumors, clinical applications of, 16 (Abst.)
Antihistamine prophylaxis, efficacy of intravenous pretesting and, in radiocontrast media–sensitive patients (Yocum, M. W., et al.), 309
Aspergillosis, allergic bronchopulmonary (Imbeau, S. A., et al.), 243 (Allergy grand rounds)
  relationships between prednisone therapy, disease activity, and total serum IgE level in (Imbeau, S. A., et al.), 91
Aspergillus antigens, comparison of prevalence of sensitization to, among asthmatics in Cleveland and London (Schwartz, H. J., et al.), 9
  fumigatus levels, airborne, outside and within large clinical center (Solomon, W. R., et al.), 56
  pulmonary disease, humoral and cellular immune responses in (Forman, S. R., et al.), 131

July, pp. 1-70; August, pp. 71-130; September, pp. 131-192; October, pp. 193-256; November, pp. 257-320; December, pp. 321-394.

Abstracts: July, pp. 1-4; August, pp. 5-10; September, pp. 11-14; October, pp. 15-18; November, pp. 19-22; December, pp. 23-26.

Aspirin intolerance; unaltered susceptibility of platelet cyclooxygenase to inhibition by aspirin in vitro (Patrono, C., et al.), 271
Asthma, bronchial, Harkavy syndrome, recurring pulmonary eosinophilia, and periarteritis nodosa, 378 (Correspondence)
childhood, three- to five-year follow-up of use of aerosol steroid, beclomethasone dipropionate, in (Godfrey, S., et al.), 335
chronic bronchitis and, mediators of immediate type hypersensitivity in sputum from patients with, 24 (Abst.)
poor terms for two common diseases (Lowell, F. C.), 325 (Editorial)
or what's in a name? (Petty, T. L.,), 323 (Editorial)
severe, immunoglobulin levels in children with, 19 (Abst.)
coffee worker's; clinical appraisal using radioallergosorbent test (Karr, R. M., et al.), 143
effects of acute corticosteriod therapy for, on serum immunoglobulin levels (Posey, W. C., et al.), 340
and hay fever, 1, 12, 19, 23 (Absts.)
improved by nonsteroidal anti-inflammatory drugs, 1 (Abst.)
treatment of, in children with triamcinolone acetonide aerosol (Sly, R., et al.), 76
Asthmatic(s), antibody-dependent cellular cytotoxicity of mononuclear cells from, tested in three in vitro assays (Flaherty, D. K., et al.), 156
children, bronchial hyperreactivity to histamine and methacholine in, after inhalation of SCH 1000 and chlorpheniramine maleate (Woenne, R., et al.), 119
decreased serum thymic factor activity in (Garaci, E., et al.), 357
in Cleveland and London, comparison of prevalence of sensitization to *Aspergillus* antigens among (Schwartz, H. J., et al.), 9
corticosteroid-dependent, long-term effects of beclomethasone dipropionate on prednisone dosage in (Bacal, E., and Patterson, R.), 72
Autoantibodies to zona pellucida: possible cause for infertility in women, 2 (Abst.)

B

Bacterial infections and eczema, recurrent, defective neutrophil chemotaxis and raised serum IgE levels in child with; influence of levamisole, 3 (Abst.)
Beclomethasone dipropionate, aerosol steroid, three- to five-year follow-up of use of, in childhood asthma (Godfrey, S., et al.), 335
long-term effects of, on prednisone dosage in corticosteroid-dependent asthmatic (Bacal, E., and Patterson, R.), 72
Benzylpenicillin, ampicillin and carbenicillin preparations examined with reagin-mediated passive cutaneous anaphylaxis system, eliciting antigenicities of, 26 (Abst.)
preparations can evoke systemic anaphylactic reaction in guinea pigs (Muranaka, M., et al.), 276
Beta adrenergic agents, lymphocyte responsiveness to; heterogeneity of human lymphocyte subpopulations to pharmacologic stimulation (Galant, S. P., et al.), 349
Breast-feeding, evidence for transmission of lymphocyte responses to tuberculin by, 18 (Abst.)
Bronchial challenge, comparison between Ketotifen and DSCG in, 23 (Abst.)
hyperreactivity to histamine and methacholine in asthmatic children after inhalation of SCH 1000 and chlorpheniramine maleate (Woenne, R., et al.), 119
Bronchitis and asthma, chronic, mediators of immediate type hypersensitivity in sputum from patients with, 24 (Abst.)
chronic, and asthma—poor terms for two common diseases (Lowell, F. C.), 325 (Editorial)
what's in a name? (Petty, T. L.), 323 (Editorial)
response to corticosteroids in (Shim, C., et al.), 363
Bronchodilating effect of oral theophylline-ephedrine combination (Sims, J. A., et al.), 15
Bronchopulmonary aspergillosis, allergic (Imbeau, S. A., et al.), 243 (Allergy grand rounds)
relationships between prednisone therapy, disease activity, and total serum IgE level in (Imbeau, S. A., et al.), 91

C

Caffeine, topical use of, with hydrocortisone in treatment of atopic dermatitis, 5 (Abst.)
Canine atopic disease, radioallergosorbent test in diagnosis of (Halliwell, R. E. W., and Kunkle, G. A.), 236
Carbenicillin, benzylpenicillin, and ampicillin preparations examined with reagin-mediated passive cutaneous anaphylaxis system, eliciting antigenicities of, 26 (Abst.)
Carcinoma, rectal, acquired angioedema associated with, and its response to danazol therapy (Cohen, S. H., et al.), 217
Celiac disease and immunological disorders, 26 (Abst.)
Cell-mediated immunity in lungs of rabbits using conjugated proteins, 16 (Abst.)
migration, effect of actin on, 13 (Abst.)
Cellular cytotoxicity, antibody-dependent, of mononuclear cells from asthmatics tested in three in vitro assays (Flaherty, D. K., et al.), 156
immune responses, humoral and, in *Aspergillus fumigatus* pulmonary disease (Forman, S. R., et al.), 131
Charcoal hemoperfusion, rapid elimination by; massive theophylline overdose, 21 (Abst.)
Chemotactic activity, neutrophil, in man, antigen-induced (Atkins, P. C., et al.), 149
factor, eosinophil; generation in human peripheral leukocytes, 15 (Abst.)
Chemotaxis defect, infections, and hyperimmunoglobulinemia E, clinical syndrome of, 6 (Abst.)
neutrophil, allergen-induced depression of, in allergic individuals (Rubin, J. L., et al.), 301
in patients with atopic dermatitis without infection, 24 (Abst.)
Chest disease, alterations in immune response in acute measles and chronic post-measles in, 18 (Abst.)
Child, preschool, recurrent wheezing in, 20 (Abst.)
Children, asthmatic, decreased serum thymic factor activity in (Garaci, E., et al.), 357
with chronic severe asthma, immunoglobulin levels in, 19 (Abst.)
immunosuppressed, influenza immunization in, 7 (Abst.)
infants and, studies of hypersensitivity reactions to foods in (Bock, S. A., et al.), 327
treatment of asthma in, with triamcinolone acetonide aerosol (Sly, R. M., et al.), 76
Chlorpheniramine maleate, SCH 1000 and, bronchial hyperreactivity to histamine and methacholine in asthmatic children after inhalation of (Woenne, R., et al.), 119
Chlorphenothiazine derivatives, demonstration of antibodies to, 22 (Abst.)
Cigarette smokers, asymptomatic, cellular immunity to lung homogenate in, 25 (Abst.)
Clinical center, large, airborne *Aspergillus fumigatus* levels outside and within (Solomon, W. R., et al.), 56
Coffee worker's asthma; clinical appraisal using radioallergosorbent test (Karr, R. M., et al.), 143
Complement, in vitro activation of alternative pathway of, by settled grain dust (Olenchock, S. A., et al.), 295
Congenital immunodeficiency, circulating thymic-hormone activity in, 17 (Abst.)
Contact sensitivity, trichophytin, in patients with dermatophytosis, 5 (Abst.)
Contrast media studies, radiographic, in high-risk patients (Kelly, J. F., et al.), 181
Correspondence, 190, 378
Corticosteroid-dependent asthmatic, long-term effects of beclomethasone dipropionate on prednisone dosage in (Bacal, E., and Patterson, R.), 72

Corticosteriod(s) effect on immunoglobulins (Settipane, G. A., et al.), 162
response to, in chronic bronchitis (Shim, C., et al.), 363
therapy, acute, for asthma, effects of, on serum immunoglobulin levels (Posey, W. C., et al.), 340
Cow's milk protein, specific antibodies in infants with gastrointestinal intolerance to, 11 (Abst.)
Cyclic AMP, thymosin-induced human serum factor increasing, 7 (Abst.)
platelet dysfunction in Ige-mediated allergy (Gallagher, J. S., et al.), 229
Cyclo-oxygenase, platelet, unaltered susceptibility of, to inhibition by aspirin in vitro; aspirin intolerance (Patrono, C., et al.), 271
Cytotoxicity, antibody-dependent cellular, of mononuclear cells from asthmatics tested in three in vitro assays (Flaherty, D. K., et al.), 156

D

Danazol therapy, acquired angioedema associated with rectal carcinoma and its response to (Cohen, S. A., et al.), 217
Deacylation and prostaglandin synthesis and actions, characterization of reaction sequence involved in phospholipid labeling and (Needleman, P.), 96
Dermatitis, atopic, topical use of caffeine with hydrocortisone in treatment of, 5 (Abst.)
without infection, neutrophil chemotaxis in patients with, 24 (Abst.)
Dermatology, 5, 24 (Absts.)
Dermatophytosis, trichophytin contact sensitivity in patients with, 5 (Abst.)
Dextran reaction in rat, insulin and, 9 (Abst.)
Disease(s) activity, prednisone therapy, and total serum IgE level in allergic bronchopulmonary aspergillosis, relationships between (Imbeau, S. A., et al.), 91
canine atopic, radioallergosorbent test in diagnosis of (Halliwell, R. E. W., and Kunkle, G. A.), 236
celiac, and immunological disorders, 26 (Abst.)
humidifier, antibody activity in sera of patients with (Patterson, R., et al.), 103
rheumatic, immune complexes in (McDuffie, F. C.), 37
two common, chronic bronchitis and asthma poor terms for (Lowell, F. C.), 325 (Editorial)
Disodium cromoglycate in anaphylaxis and pollinosis, 4
DNCB, studies on contact sensitivity to, in guinea pigs by macrophage migration test, 13 (Abst.)
Drugs, corticosteroid, response to, in chronic bronchitis (Shim, C., et al.), 363
nonsteroidal anti-inflammatory, asthma improved by, 1 (Abst.)
DSCG, Ketotifen and, comparison between, in bronchial challenge, 23 (Abst.)
Dust, settled grain, in vitro activation of alternative pathway of complement by (Olenchock, S. A. et al.), 295

E

Eczema, recurrent bacterial infections and, defective neutrophil chemotaxis and raised serum IgE levels in child with; influence of levamisole, 3 (Abst.)
Education in allergy and immunology in United States of America in 1978, status of (Frick, O. L.), 1 (Presidential address)
Eosinopenia, prostaglandin-induced, in splenectomized rats (Kurosawa, M. et al.), 33
Eosinophil chemotactic factor (ECF). III. Generation in human peripheral leukocytes, 15 (Abst.)
Eosinophilia, recurring pulmonary, Harkavy syndrome, bronchial asthma, and periarteritis nodosa, 378 (Correspondence)
Ephedrine-theophylline combination, oral, bronchodilating effect of (Sims, J. A., et al.), 15
Erythema multiforme (Stevens-Johnson syndrome) following ingestion of trimethoprim-sulfamethoxazole on two separate occasions in same person (Azinge, N. O., and Garrick, G. A.), 125
Erythromelalgia, pathogenesis of, 6 (Abst.)
Ethylene oxide gas, allergy to product(s) of (Dolovich, J., and Bell, B.), 30
Executive Committee of American Academy of Allergy, statement by, 71

F

Farmer's lung disease among farmers with precipitating antibodies to thermophilic actinomycetes; clinical and immunologic study (Marx, J. J., Jr., et al.), 185
Foods, studies of hypersensitivity reactions to, in infants and children (Bock, S. A., et al.), 327
Fungal antigens as source of sensitization and respiratory disease in Scottish malt workers, 14 (Abst.)
Fungus among us, what does it really mean? (Slavin, R. G.), 7 (Editorial)

G

Gas, ethylene oxide, allergy to product(s) of (Dolovich, J., and Bell, B.), 30
Gastrointestinal intolerance to cow's milk protein, specific antibodies in infants with, 11 (Abst.)
Grain dust, settled, in vitro activation of alternative pathway of complement by (Olenchock, S. A., et al.), 295
Grass allergens, ragweed and, quantitation of IgE antibody specific for; binding of radiolabeled allergens by solid-phase bound IgE (Zeiss, C. R., et al.), 83
Guinea pigs, benzylpenicillin preparations can evoke systemic anaphylactic reaction in (Muranaka, M., et al.), 276
studies on contact sensitivity to DNCB in, by macrophage migration test, 13 (Abst.)
suppression of reaginic antibody formation in, by anti-idiotypic antibodies (Geczy, A. F., et al.), 261

H

Hapten, suppression of delayed hypersensitivity to, by induction of tolerance to carrier, 17 (Abst.)
Harkavy syndrome, bronchial asthma, recurring pulmonary eosinophilia, and periarteritis nodosa, 378 (Correspondence)
Hay fever, asthma and, 1, 12, 19, 23 (Abst.)
patients and controls, cellular histamine release, specific and total serum IgE levels in, 12 (Abst.)
Hemoperfusion, charcoal, rapid elimination by; massive theophylline overdose, 21 (Abst.)
Henoch-Schönlein nephritis, prognosis of, in children, 3 (Abst.)
Hepatitis B virus immune complexes, small vessel vasculitis caused by (Gower, R. G., et al.), 222
Heterogeneity of human lymphocyte subpopulations to pharmacologic stimulation (Galant, S. P., et al.), 349
Heterophil-positive infectious mononucleosis, IgE response in (Bahna, S. L., et al.), 167
Histamine and methacholine in asthmatic children after inhalation of SCH 1000 and chlorpheniramine maleate, bronchial hyperreactivity to (Woenne, R., et al.), 119
release, antigen-induced leukocyte, enhancement of, by mononuclear cell–derived factor (Bamzai, A. K., and Kretschmer, R. R.), 137
cellular, specific and total serum IgE levels in hay fever patients and controls, 12 (Abst.)
direct demonstration of, in allergic reactions in skin using skin chamber technique (Dunsky, E. H., and Zweiman, B.), 127 (Brief communication)
Human complement components, inhibition of, by *Loxosceles reclusa* venom, 22 (Abst.)
lymphoblastoid cell lines, continuous, production of antibody to tetanus toxoid by, 2 (Abst.)
lymphocyte(s) stimulated, regulation of lymphocyte proliferation by soluble products released by, 18 (Abst.)

Human—Cont'd
subpopulations, heterogeneity of, to pharmacologic stimulation (Galant, S. P., et al.), 349
serum albumin and Tween 80 as stabilizers of allergen solutions (Norman, P. S., et al.), 314
Humidifier disease, antibody activity in sera of patients with (Patterson, R., et al.), 103
Humoral and cellular immune responses in *Aspergillus fumigatus* pulmonary disease (Forman, S. R., et al.), 131
Hydrocortisone, topical use of caffeine with, in treatment of atopic dermatitis, 5 (Abst.)
Hymenoptera whole body extract therapy, 190 (Correspondence)
Hyperimmunoglobulinemia E, clinical syndrome of chemotaxis defect, infections, and, 6 (Abst.)
Hyperreactivity, bronchial, to histamine and methacholine in asthmatic children after inhalation of SCH 1000 and chlorpheniramine maleate (Woenne, R., et al.), 119
Hypersensitivity, delayed, suppression of, to hapten by induction of tolerance to carrier, 17 (Abst.)
immediate type, mediators of, in sputum from patients with chronic bronchitis and asthma, 24 (Abst.)
reactions to foods in infants and children, studies of (Bock, S. A., et al.), 327
response, Type 1, effect of low protein diet on capacity of mice to express, 12 (Abst.)
Hyposensitization, long-term, evaluation of adverse effects of (Levinson, A. I., et al.), 109

I

Immune complexes, circulating, levamisole-induced vasculitis due to, 2 (Abst.)
hepatitis B virus, small vessel vasculitis caused by (Gower, R. G., et al.), 222
laboratory evaluation of, in patients on inhalant immunotherapy (Stein, M. R., et al.), 211
in rheumatic diseases (McDuffie, F. C.), 37
response(s), alterations in, in acute measles and chronic postmeasles in chest disease, 18 (Abst.)
humoral and cellular, in *Aspergillus fumigatus* pulmonary disease (Forman, S. R., et al.), 131
other, relationships between IgE antibody production and; effect of thymectomy at various times after birth, 25 (Abst.)
Immunity, cell-mediated, in lungs of rabbits using conjugated proteins, 16 (Abst.)
cellular, to lung homogenate in asymptomatic cigarette smokers, 25 (Abst.)
Immunization, influenza, in immunosuppressed children, 7 (Abst.)
Immunodeficiency, congenital, circulating thymic-hormone activity in, 17 (Abst.)
Immunogenic properties of tobacco smoke (Lehrer, S. B., et al.), 368
Immunoglobulin(s) class production, switch in, observed in single clones of committed lymphocytes, 2 (Abst.)
corticosteroid effect on (Settipane, G. A., et al.), 162
E antibody(ies) production, control of, by suppressor substances (Katz, D. H.), 44
and other immune responses, relationships between; effect of thymectomy at various times after birth, 25 (Abst.)
persistent and boosterable, in mice injected with low doses of ovalbumin and silica, 15 (Abst.)
reactivity of ragweed allergens with (Adolphson, C., et al.), 197
specific for ragweed and grass allergens, quantitation of; binding of radiolabeled allergens by solid-phase bound IgE (Zeiss, C. R., et al.), 83
suppression of, 257 (Editorial)
level(s), specific and total serum, cellular histamine release, in hay fever patients and controls, 12 (Abst.)
total serum, in allergic bronchopulmonary aspergillosis, relationships between prednisone therapy, disease activity, and (Imbeau, S. A., et al.), 91
Immunoglobulin E levels—Cont'd
-mediated allergy, cyclic platelet dysfunction in (Gallagher, J. S., et al.), 229
response in heterophil-positive infectious mononucleosis (Bahna, S. L., et al.), 167
levels in children with chronic severe asthma, 19 (Abst.)
serum, effects of acute corticosteroid therapy for asthma on (Posey, W. C., et al.), 340
Immunologic(al) disorders, celiac disease and, 26 (Abst.)
mechanism as cause of sulfisoxazole-induced thrombocytopenic purpura, 21 (Abst.)
partial identity and in vitro inhibitory effect of two major timothy pollen allergens to whole pollen extract of four grasses, 23 (Abst.)
study, clinical and; farmer's lung disease among farmers with precipitating antibodies to thermophilic actinomycetes (Marx, J. J., Jr., et al.), 185
Immunology, 2, 7, 13, 16, 24 (Absts.)
and allergy, physician manpower in, 61 (Report)
in United States of America in 1978, status of education in (Frick, O. L.), 1 (Presidential address)
Immunotherapy, improved method of; polymerized whole ragweed (Bacal, E., et al.), 289
inhalant, laboratory evaluation of immune complexes in patients on (Stein, M. R., et al.), 211
Infants and children, studies of hypersensitivity reactions to foods in (Bock, S. A., et al.), 327
with gastrointestinal intolerance to cow's milk protein, specific antibodies in, 11 (Abst.)
Infection(s), chemotaxis defect, and hyperimmunoglobulinemia E, clinical syndrome of, 6 (Abst.)
neutrophil chemotaxis in patients with atopic dermatitis without, 24 (Abst.)
viral, as precipitant of wheeze in children; combined home and hospital study, 11 (Abst.)
respiratory tract, interferon in nasal secretions from infants with, 24 (Abst.)
Infectious mononucleosis, heterophil-positive, IgE response in (Bahna, S. L., et al.), 167
Infertility in women, autoantibodies to zona pellucida possible cause for, 2 (Abst.)
Influenza immunization in immunosuppressed children, 7 (Abst.)
respiratory syncytial, and parainfluenza virus infections, interferon production in children with, 20 (Abst.)
Insulin and dextran reaction in rat, 9 (Abst.)
Interferon in nasal secretions from infants with viral respiratory tract infections, 24 (Abst.)
production in children with respiratory syncytial, influenza, and parainfluenza virus infections, 20 (Abst.)
Intratracheal instillation, delay in development of allergic response to metals following, 21 (Abst.)
Iodinated contrast material, anaphylactoid reactions to (Lieberman, P., et al.), 174

K

Ketotifen and DSCG, comparison between, in bronchial challenge, 23 (Abst.)

L

Laboratory evaluation of immune complexes in patients on inhalant immunotherapy (Stein, M. R., et al.), 211
Leukocyte(s) histamine release, antigen-induced, enhancement of, by mononuclear cell–derived factor (Bamzai, A. K., and Kretschmer, R. R.), 137
human peripheral, generation in; eosinophil chemotactic factor (ECF), 15 (Abst.)
Levamisole-induced vasculitis due to circulating immune complexes, 2 (Abst.)
Levamisole, influence of, on defective neutrophil chemotaxis and raised serum IgE levels in child with recurrent bacterial infections and eczema, 3 (Abst.)
Loxosceles reclusa venom, inhibition of human complement components by, 22 (Abst.)

Lung disease, farmer's, among farmers with precipitating antibodies to thermophilic actinomycetes; clinical and immunologic study (Marx, J. J., Jr., et al.), 185
homogenate, cellular immunity to, in asymptomatic cigarette smokers, 25 (Abst.)
Lymphoblastoid cell lines, continuous human, production of antibody to tetanus toxoid by, 2 (Abst.)
Lymphocyte(s), committed, switch in immunoglobulin class production observed in single clones of, 2 (Abst.)
phytohemagglutinin-stimulated, enhancement by oleandomycin of inhibitory effect of methylprednisolone on (Ong, K. S., et al.), 115
proliferation, regulation of, by soluble products released by stimulated human lymphocytes, 18 (Abst.)
responses, evidence for transmission of, to tuberculin by breast-feeding, 18 (Abst.)
subpopulations, human, heterogeneity of, to pharmacologic stimulation (Galant, S. P., et al.), 349

M

Macrophage migration test, studies on contact sensitivity to DNCB in guinea pigs by, 13 (Abst.)
Malt workers, Scottish, fungal antigens as source of sensitization and respiratory disease in, 14 (Abst.)
Man, circulating suppressor cells in, as function of age, 8 (Abst.)
Manpower, physician, in allergy and immunology, 61 (Report)
Measles, acute, and chronic post-measles in chest disease, alterations in immune response in, 18 (Abst.)
Metals, delay in development of allergic response to, following intratracheal instillation, 21 (Abst.)
Meteorologic factors, effect of central air conditioning and, on indoor spore counts (Hirsch, D. J., et al.), 22
Methacholine, histamine and, bronchial hyperreactivity to, in asthmatic children after inhalation of SCH 1000 and chlorpheniramine maleate (Woenne, R., et al.), 119
Methylprednisolone, enhancement by oleandomycin of inhibitory effect of, on phytohemagglutinin-stimulated lymphocytes (Ong, K. S., et al.), 115
Mice injected with low doses of ovalbumin and silica, persistent and boosterable IgE antibody production in, 15 (Abst.)
Monkey airway, rhesus, study of effect of slow-reacting substances of anaphylaxis on (Patterson, R., et al.), 371
Monocytes, normal human, inhibit tumor cell growth in vitro (King, G. W., et al.), 283
Mononuclear cell–derived factor, enhancement of antigen-induced leukocyte histamine release by (Bamzai, A. K., and Kretschmer, R. R.), 137
cells from asthmatics tested in three in vitro assays, antibody-dependent cellular cytotoxicity of (Flaherty, D. K., et al.), 156
Mononucleosis, heterophil-positive infectious, IgE response in (Bahna, S. L., et al.), 167

N

Nasal secretions from infants with viral respiratory tract infections, interferon in, 24 (Abst.)
Nephritis, Henoch-Schönlein, prognosis of, in children, 3 (Abst.)
Neutrophil chemotactic activity in man, antigen-induced (Atkins, P. C., et al.), 149
chemotaxis in allergic individuals, allergen-induced depression of (Rubin, J. L., et al.), 301
defective, and raised serum IgE levels in child with recurrent bacterial infections and eczema; influence of levamisole, 3 (Abst.)
in patients with atopic dermatitis without infection, 24 (Abst.)

O

Oleandomycin, enhancement by, of inhibitory effect of methylprednisolone on phytohemagglutinin-stimulated lymphocytes (Ong, K. S., et al.), 115
Ovalbumin and silica, persistent and boosterable IgE antibody production in mice injected with low doses of, 15 (Abst.)

P

Parainfluenza virus infection, respiratory syncytial, influenza, and, interferon production in children with, 20 (Abst.)
Passive cutaneous anaphylaxis system, reagin-mediated, eliciting antigenicities of benzylpenicillin, ampicillin and carbenicillin preparations examined with, 26 (Abst.)
Pathogenesis of erythromelalgia, 6 (Abst.)
Pathology, pharmacology, and physiology, 1, 12, 15, 21 (Absts.)
Pediatrics, 7, 11, 16, 20, 24 (Absts.)
Periarteritis nodosa, Harkavy syndrome, bronchial asthma, recurring pulmonary eosinophilia, and, 378 (Correspondence)
Pharmacologic stimulation, heterogeneity of human lymphocyte subpopulations to (Galant, S. P., et al.), 349
Pharmacology, physiology, and pathology, 1, 12, 15, 21 (Absts.)
Phenobarbital, effect of, on theophylline disposition (Landay, R. A., et al.) 27
Phospholipid labeling and deacylation and prostaglandin synthesis and actions, characterization of reaction sequence involved in (Needleman, P.), 96
Physician manpower in allergy and immunology, 61 (Report)
Physiology, pharmacology, and pathology, 1, 12, 15, 21 (Absts.)
Phytohemagglutinin-stimulated lymphocytes, enhancement by oleandomycin of inhibitory effect of methylprednisolone on (Ong, K. S., et al.), 115
Platelet cyclo-oxygenase, unaltered susceptibility of, to inhibition by aspirin in vitro; aspirin intolerance (Patrono, C., et al.), 271
dysfunction, cyclic, in IgE-mediated allergy (Gallagher, J. S., et al.), 229
Pollinosis, anaphylaxis and, disodium cromoglycate in, 4 (Abst.)
Polyethylene glycol, abrogation of reaginic antibodies with allergens conjugated to; suppression of reaginic antibodies with modified allergens, 9 (Abst.)
reduction in allergenicity of protein allergens by conjugation to; suppression of reaginic antibodies with modified allergens, 8 (Abst.)
Polymerized whole ragweed; improved method of immunotherapy (Bacal, E., et al.), 289
Prednisone dosage, long-term effects of beclomethasone dipropionate on, in corticosteroid-dependent asthmatic (Bacal, E., and Patterson, R.), 72
therapy, disease activity, and total serum IgE level in allergic bronchopulmonary aspergillosis, relationships between (Imbeau, S. A., et al.), 91
Prophylaxis, antihistamine, efficacy of intravenous pretesting and, in radiocontrast media–sensitive patients (Yocum, M. W., et al.), 309
Prostaglandin-induced eosinopenia in splenectomized rats (Kurosawa, M., et al.), 33
Prostaglandin synthesis and actions, characterization of reaction sequence involved in phospholipid labeling and deacylation and (Needleman, P.), 96
Protein(s) allergens, reduction in allergenicity of, by conjugation to polyethylene glycol; suppression of reaginic antibodies with modified allergens, 8 (Abst.)
conjugated, cell-mediated immunity in lungs of rabbits using, 16 (Abst.)
diet, low, effect of, on capacity of mice to express Type I hypersensitivity response, 12 (Abst.)
Pulmonary disease, *Aspergillus fumigatus*, humoral and cellular immune responses in (Forman, S. R., et al.), 131
function, effects of sputum on, 1 (Abst.)
Purpura, sulfisoxazole-induced thrombocytopenic, immunologic mechanism as cause, 21 (Abst.)

R

Rabbits, cell-mediated immunity in lungs of, using conjugated proteins, 16 (Abst.)
Radioallergosorbent test, clinical appraisal using; coffee worker's asthma (Karr, R. M., et al.), 143

Radioallergosorbent test—Cont'd
in diagnosis of canine atopic disease (Halliwell, R. E. W., and Kinkle, G. A.), 236
Radiocontrast media–sensitive patients, efficacy of intravenous pretesting and antihistamine prophylaxis in (Yocum, M. W., et al.), 309
Radiographic contrast media studies in high-risk patients (Kelly, J. F., et al.), 181
Ragweed allergens, reactivity of, with IgE antibodies (Adolphson, C., et al.), 197
and grass allergens, quantitation of IgE antibody specific for; binding of radiolabeled allergens by solid-phase bound IgE (Zeiss, C. R., et al.), 83
polymerized whole; improved method of immunotherapy (Bacal, E., et al.), 289
Rat(s), insulin and dextran reaction in, 9 (Abst.)
splenectomized, prostaglandin-induced eosinopenia in (Kurosawa, M., et al.) 33
Reaction(s), allergic, in skin using skin chamber technique, direct demonstration of histamine release in (Dunsky, E. H., and Zweiman, B.), 127 (Brief communication)
dextran, in rat, insulin and, 9 (Abst.)
hypersensitivity, to foods in infants and children, studies of (Bock, S. A., et al.), 327
sequence involved in phospholipid labeling and deacylation and prostaglandin synthesis and actions, characterization of (Needleman, P.), 96
systemic anaphylactic, in guinea pigs, benzylpenicillin preparations can evoke (Muranaka, M., et al.), 276
Reactivity of ragweed allergens with IgE antibodies (Adolphson, C., et al.), 197
Reaginic antibody(ies) formation in guinea pigs by anti-idiotypic antibodies, suppression of (Geczy, A. F., et al.), 261
suppression of, with modified allergens; abrogation of reaginic antibodies with allergens conjugated to polyethylene glycol, 9 (Abst.)
Rectal carcinoma, acquired angioedema associated with, and its response to danazol therapy (Cohen, S. H., et al.), 217
Respiratory disease, sensitization and, in Scottish malt workers, fungal antigens as source of, 14 (Abst.)
syncytial, influenza, and parainfluenza virus infections, interferon production in children with, 20 (Abst.)
tract infections, viral interferon in nasal secretions from infants with, 24 (Abst.)
Reviewers, acknowledgment to, 321
Rhesus monkey airway, study of effect of slow-reacting substances of anaphylaxis on (Patterson, R., et al.), 371
Rheumatic diseases, immune complexes in (McDuffie, F. C.), 37

S

SCH 1000 and chlorpheniramine maleate, bronchial hyperreactivity to histamine and methacholine in asthmatic children after inhalation of (Woenne, R., et al.), 119
Scottish malt workers, fungal antigens as source of sensitization and respiratory disease in, 14 (Abst.)
Sensitivity, contact, to DNCB in guinea pigs by macrophage migration test, studies on, 13 (Abst.)
trichophytin contact, in patients with dermatophytosis, 5 (Abst.)
Sensitization to *Aspergillus* antigens among asthmatics in Cleveland and London, comparison of prevalence of (Schwartz, H. J., et al.), 9
and respiratory disease in Scottish malt workers, fungal antigens as source of, 14 (Abst.)
Serum(a) albumin, human, and Tween 80 as stabilizers of allergen solutions (Norman, P. S., et al.), 314
carcinoembryonic antigen and alpha-fetoprotein levels, clinical applications of, in children with solid tumors, 16 (Abst.)
factor, thymosin-induced human, increasing cyclic AMP, 7 (Abst.)
immunoglobulin E levels, specific and total, cellular histamine release, in hay fever patients and controls, 12 (Abst.)
Serum—Cont'd
levels, effects of acute corticosteroid therapy for asthma on (Posey, W. C., et al.), 340
of patients with humidifier disease, antibody activity in (Patterson, R., et al.) 103
thymic factor activity, decreased, in asthmatic children (Garaci, E., et al.), 357
Silica, ovalbumin and, persistent and boosterable IgE antibody production in mice injected with low doses of, 15 (Abst.)
Skin chamber technique, direct demonstration of histamine release in allergic reactions in skin using (Dunsky, E. H., and Zweiman, B.), 127 (Brief communication)
test, allergy, terbutaline's effect on (Imbeau, S. A., et al.), 193
Smoke, tobacco, immunogenic properties of (Lehrer, S. B., et al.), 368
Smokers, asymptomatic cigarette, cellular immunity to lung homogenate in, 25 (Abst.)
Societies, state, regional, and local allergy, listing of presidents of, as of February, 1978, 67
Splenectomized rats, prostaglandin-induced eosinopenia in (Kurosawa, M., et al.), 33
Spore counts, indoor, effect of central air conditioning and meteorologic factors on (Hirsch, D. J., et al.), 22
Sputum, effects of, on pulmonary function, 1 (Abst.)
from patients with chronic bronchitis and asthma, mediators of immediate type hypersensitivity in, 24 (Abst.)
Steroid, aerosol, beclomethasone dipropionate, three- to five-year follow-up of use of, in childhood asthma (Godfrey, S., et al.), 335
Steroidal, non-, anti-inflammatory drugs, asthma improved by, 1 (Abst.)
Stevens-Johnson syndrome (erythema multiforme) following ingestion of trimethoprimsulfamethoxazole on two separate occasions in same person (Azinge, N. O., and Garrick, G. A.), 125
Sulfamethoxazole-trimethoprim, Stevens-Johnson syndrome (erythema multiforme) following ingestion of, on two separate occasions in same person (Azinge, N. O., and Garrick, G. A.), 125
Sulfisoxazole-induced thrombocytopenic purpura; immunologic mechanism as cause, 21 (Abst.)
Suppressor cells, circulating, in man as function of age, 8 (Abst.)
substances, control of IgE antibody production by (Katz, D. H.), 44
Syncytial, respiratory, influenza, and parainfluenza virus infections, interferon production in children with, 20 (Abst.)

T

Terbutaline's effects on allergy skin test (Imbeau, S. A., et al.), 193
Test, allergy skin, terbutaline's effects on (Imbeau, S. A., et al.), 193
Tetanus toxoid, production of antibody to, by continuous human lymphoblastoid cell lines, 2 (Abst.)
Theophylline disposition, effect of phenobarbital on (Landay, R. A., et al.), 27
-ephedrine combination, bronchodilating effect of (Sims, J. A., et al.), 15
overdose, massive; rapid elimination by charcoal hemoperfusion, 21 (Abst.)
Therapy, acute corticosteriod, for asthma, effects of, on serum immunoglobulin levels (Posey, W. C., et al.), 340
Hymenoptera whole body extract, 190 (Correspondence)
Thermophilic actinomycetes, farmer's lung disease among farmers with precipitating antibodies to; clinical and immunologic study (Marx, J. J., Jr., et al.), 185
Thrombocytopenic purpura, sulfisoxazole-induced; immunologic mechanism as cause, 21 (Abst.)
Thymectomy, effect of, at various times after birth; relationships between IgE antibody production and other immune responses, 25 (Abst.)

Thymic factor activity, decreased serum, in asthmatic children (Garaci, E., et al.), 357
-hormone activity, circulating, in congenital immunodeficiency, 17 (Abst.)
Thymosin-induced human serum factor increasing cyclic AMP, 7 (Abst.)
Timothy pollen allergens, two major, immunological, partial identity and in vitro inhibitory effect of, to whole pollen extract of four grasses, 23 (Abst.)
Tobacco smoke, immunogenic properties of (Lehrer, S. B., et al.), 368
Topical use of caffeine with hydrocortisone in treatment of atopic dermatitis, 5 (Abst.)
Toxoid, tetanus, production of antibody to, by continuous human lymphoblastoid cell lines, 2 (Abst.)
Triamcinolone acetonide aerosol, treatment of asthma in children with (Sly, R. M., et al.), 76
Trichophytin contact sensitivity in patients with dermatophytosis, 5 (Abst.)
Trimethoprim-sulfamethoxazole, Stevens-Johnson syndrome (erythema multiforme) following ingestion of, on two separate occasions in same person (Azinge, N. O., and Garrick, G. A.), 125
Tuberculin, evidence for transmission of lymphocyte responses to, by breast-feeding, 18 (Abst.)
Tumor(s) cell growth in vitro, normal human monocytes inhibit (King, G. W., et al.), 283
solid, clinical applications of serum carcinoembryonic antigen and alpha-fetoprotein levels in children with, 16 (Abst.)
Tween 80, human serum albumin and, as stabilizers of allergen solutions (Norman, P. S., et al.), 314

V

Vasculitis, levamisole-induced, due to circulating immune complexes, 2 (Abst.)
small vessel, caused by hepatitis B virus immune complexes (Grower, R. G., et al.), 222
Venom, *Loxosceles reclusa*, inhibition of human complement components by, 22 (Abst.)
Viral infection as precipitant of wheeze in children; combined home and hospital study, 11 (Abst.)
respiratory tract infections, interferon in nasal secretions from infants with, 24 (Abst.)
Virus immune complexes, hepatitis B, small vessel vasculitis caused by (Gower, R. G., et al.), 222
infections, respiratory syncytial, influenza, and parainfluenza, interferon production in children with, 20 (Abst.)

W

Wheeze in children, viral infection as precipitant of; combined home and hospital study, 11 (Abst.)
Wheezing, recurrent, in preschool child, 20 (Abst.)
Women, possible cause of autoantibodies to zona pellucida for infertility in, 2 (Abst.)

Z

Zona pellucida, autoantibodies to: possible cause for infertility in women, 2 (Abst.)
